

FOR IMMEDIATE RELEASE

KOBELCO Construction Machinery and KOBELCO Construction Machinery U.S.A. File Appeal of U.S. ITC Determination

KOBELCO Construction Machinery Co., Ltd. ("KCM") and KOBELCO Construction Machinery U.S.A. Inc. ("KCMU") announced today that they have filed an action with the U.S. Court of International Trade ("CIT") seeking judicial review of the final injury determination issued by the U.S. International Trade Commission ("ITC") in the antidumping duty investigation concerning imports of lattice boom crawler cranes from Japan.

The companies believe that important factual and legal issues arising from the ITC's determination warrant judicial review and have therefore elected to pursue the remedies available under U.S. law.

KCM and KCMU remain confident in the competitiveness, performance, and value of their products and have proudly served customers in North America for many years, establishing long-standing relationships with customers, dealers, rental companies, and other stakeholders across the construction industry. Seeking judicial review of the ITC's determination is consistent with the companies' commitment to ensuring that all relevant facts and legal issues receive appropriate consideration through the judicial process.

"Our decision to seek judicial review reflects our commitment to protecting the interests of our customers, dealers, employees, and business partners while ensuring that the facts and legal issues are properly evaluated through the judicial process."

The appeal does not affect KCM's or KCMU's ongoing operations in the United States. Both companies will continue to serve customers through their established sales, distribution, parts, and service networks and remain fully committed to the North American market.

As this matter is currently pending before the courts, KCM, and KCMU will not comment further on the specific legal issues that may be addressed during the litigation process.

About KOBELCO Construction Machinery

KOBELCO Construction Machinery USA offers industry-leading crawler cranes and crawler excavators that include zero tail swing, compact, standard, long-reach, mass excavation, recycling/scrap, and demolition models. KOBELCO is committed to producing quality machines with advanced productivity-boosting features, more standard equipment, and innovative technologies. So, when it comes to superior performance, efficiency, safety, and overall added value, KOBELCO truly is "Built Like No Other".
