

For Immediate Release

KOBELCO CONSTRUCTION MACHINERY USA

Planning Another Exciting CONEXPO-CON/AGG Exhibit for 2023

Katy, TX – KOBELCO Construction Machinery USA continues its commitment to quality and innovation with plans to highlight its latest advancements at CONEXPO-CON/AGG, held March 14-18, at the Las Vegas Convention Center. The exciting KOBELCO exhibit – located in the Festival Grounds booth F9453 – will feature a large selection of crawler cranes and excavators. These new models will showcase the company’s latest series of models.

“KOBELCO is continually working to develop new solutions and innovations that provide customers with increased productivity, efficiency and overall added value” says Jack Fendrick, COO and Vice President of KOBELCO USA. “We have launched over 22 new -7 and -11 series excavators and eight G-3 new model crawler cranes in just the last 20 months. We also have several additional upcoming model releases soon. We’re excited to exhibit our latest innovations at CONEXPO and look forward to showcasing the unique capabilities that demonstrate that KOBELCO cranes and excavators are “built like no other.”

More than 20 machines will be displayed in the expansive, 30,400-sq ft KOBELCO exhibit space, including: three new revolutionary G-3 series crawler crane models CK1600, CK2000, CK2750. From the excavator division there is an array of new mini, short radius, and conventional models. KOBELCO also plans to display various specialty machines for automotive dismantling and building demolition, as well as a new material handler for scrap applications, and exhibit a custom wrapped machine in honor of those who served in the U.S Military.

In addition to unveiling several new models, KOBELCO will highlight the unmatched power, efficiency, safety, durability, and quality of its machines. The KOBELCO exhibit will feature the

company's exclusive excavator iNDR Cooling System, KOMEXS machine monitoring technology, and display its rich history of innovation, parts and service dedication, with strong dealer network support. KOBELCO looks forward to show its large range of new series products and welcomes the boldest and bravest individuals to participate in the KOBELCO "No Bull" Challenge.

The KOBELCO USA exhibit is located in the Festival Grounds booth F9453. KOBELCO crawler cranes and excavators experts will be readily available to assist attendees, conduct product walk-arounds, and answer questions.

KOBELCO Construction Machinery USA offers industry-leading crawler cranes and excavators. Excavators in the 3,000 lb. and up range include compact, zero tail swing, conventional, long reach, high and wide undercarriages, auto recycling and demolition models. Crawler cranes start at 80-tons and go up to 330-ton models. KOBELCO is well-known as the crawler crane and excavator authority, KOBELCO is committed to producing quality machines with advanced productivity-boosting features, innovative technologies and an overall added value package.
